

CREATING THE HTML PAGES

We need to create two pages for the site what we are designing.

The two pages have same textual manner but the content of the page is different.

One page is for getting input from the user and another page will display the output that what we actually calculated in the background through the formula.

The BMI formula is

$$\text{BMI} = \text{weight in kg} / \text{height in m}^2$$

The images of the pages are below:

Enter the height

Enter the weight

BMI
